

be.tex® Samba® FR

Art.No. 04834-XXXX-6266

Description

be.tex® Samba® FR - the original, that sets the benchmark. The robust all-round talent for impressive advertising. Its easy handling and the excellent display of contrasting colours have made millions of good impressions. For very large projects, now also available in 5 metre width: be.tex® Samba® Twin FR.

Paper transfer printing on the uncoated side. Latex printing for backlighting requires high ink application.

Important: Run a print test! Many factors influence the textile during printing and application. Thoroughly treated, the printed textile can be carefully folded. Self-adhesive flat profile cannot be used because the uncoated side has a lotus effect. Water column: coated side > 900 mm, uncoated side > 650 mm. All information is based on experience, but is legally non-binding and without guarantee.

Main Application
