

GUIDELINES ON HYGIENE RULES - DO YOU NEED ASSISTANCE?

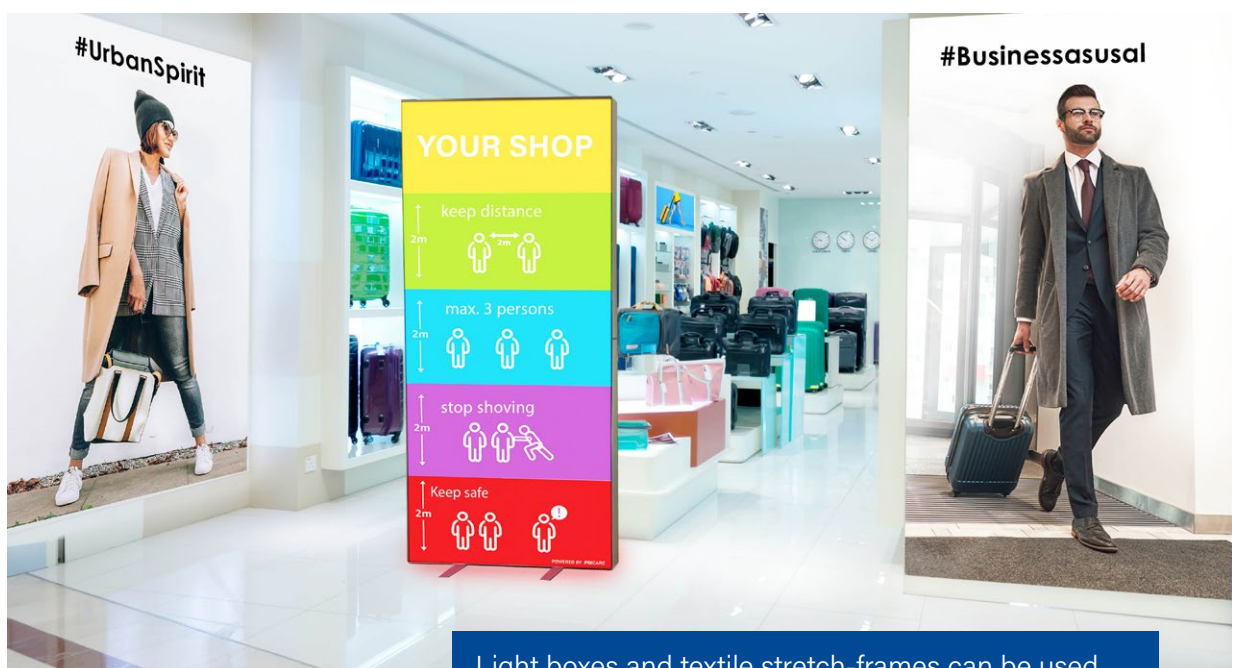

Ladies and gentlemen,

we are pleased that retail stores in Germany, with a store area of up to 800 m², may be reopened under tightened hygiene measures, and that we are slowly approaching normality. However, the protection of each individual against infection is still the main priority, and therefore we must be prepared now! In addition to; makeshift mouth-and-nose masks and disposable aprons, partitions and protective walls in the checkout area or as room dividers between customers, are recommended. This minimises the transmission of infection droplets and serves to increase the customers' feeling of safety.

With the above in mind, how are companies supposed to manage and implement this, under the current financial downturn?

We at **berger**textiles have discussed this with our partners and created a **berger**textiles #WeCare platform as a unified network. Here we present solutions that some of our partners are already implementing with **berger**textiles materials. Currently, some key applications are; disinfection stations, partition walls, information signs and makeshift mouth-nose masks.

We will show you examples of how you can equip your point of sale areas, so that they comply with hygiene regulations. At the same time, you can advertise your exclusive products or draw attention to important information.

Light boxes and textile stretch-frames can be used for displaying information or as advertising boards.

We are happy to establish contacts with our customers who manufacture the corresponding products.
 We wish you good luck and health in mastering the difficult Covid-19 situation. Stay healthy.
