

GET READY... FOR THE REOPENING OF THE HOSPITALITY INDUSTRY!

The hospitality industry, which was hit particularly hard by the Corona crisis, is now able to reopen in some countries, under tightened hygiene measures. However, it may be difficult, especially for many smaller businesses, to implement these measures in a precise customized manner. Besides hygiene masks, distance markings and disposable items, protective walls are recommended as room dividers between tables. This minimizes the transmission of droplet infections and serves to increase customers' feelings of safety.

Particularly suitable are freestanding textile frames, such as Zipper Walls with a light aluminium frame, which are available in various widths and lengths and can therefore be used flexibly in any location. These walls are easy to erect, uncomplicated to transport and the fabric cover, which can be printed on both sides, offers additional space for individual advertising or a menu.

Benefit now from our product offers until 15 June 2020

bergertextiles has the following textiles available for you:

- **be.tex® Expandable Premium FR**, a very opaque and soft material which, thanks to its unique Colour- Boost coating, gives graphics and colours a particularly vibrant and high-quality appearance.
- **be.tex® SEG Display FR**, a cost-effective alternative, with our proprietary Colour-Boost coating, for superior print output.

Both textiles are flame retardant (FR) and are characterised by the fact that they do not fray, are crease- resistant and are easy to put on due to their increased softness and elasticity. For other applications that are not to be printed on, we have other commercial-grade fabrics available.

Please contact us for more information about this offer.
