

TPEdge flat profile

Art.No. 04476-0001

TPEdge Flat Profile is an innovative SEBS-based Thermoplastic Elastomer (TPE) keder designed to deliver flawless textile installations. Its smooth, low-friction surface allows for seamless sewing into textile edges, while the advanced SEBS-based TPE material offers excellent flexibility and durability. Engineered with an optimized upright structure, simplifies handling, ensures precise positioning, and guarantees secure insertion into aluminum profile systems for a clean, professional finish every time.

Facts

Material	100% Thermoplastic Elastomer
Width	12 mm 14 mm, more on request
Colour	White
Thickness	3 mm
Hardness (Shore-A)	65 shore A (according to ASTM D 2240)
Density (g/cm ³)	1.20 g/cm ³ (according to ASTM D 792)
Tensile Strength at 300% Elongation	2.6 MPa (according to ASTM D 412)

Applications

- Ceiling Covering ▪ Display Frame System
- Light Box ▪ Pop-up Display System

Features

Important Notice

Please test the product under your specific application conditions before use, as performance may vary depending on processing methods and environmental factors. Store in a dry environment at normal room temperature, protected from excessive heat, frost, direct sunlight and extreme temperature fluctuations. All technical data and recommendations are provided for general reference purposes only, without guarantee or warranty, and are not legally binding. Production-related tolerances and variations may occur.
